

Supplemental Figure 1. Multiple moderated mediation model in the full analytic sample.

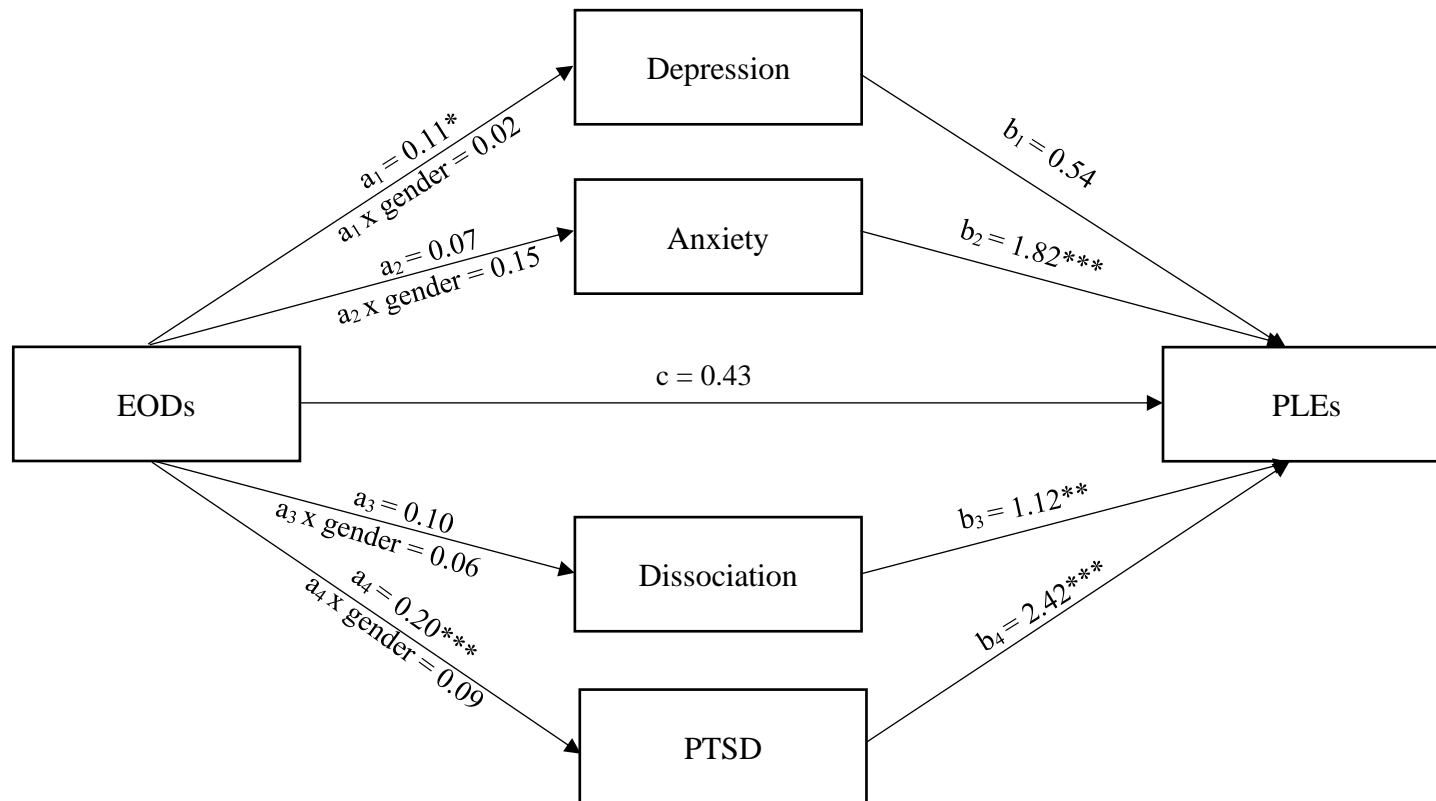

Notes. * $p > 0.05$, ** $p > 0.01$, *** $p > 0.001$; EODs= experiences of discrimination, PLEs= psychotic-like experiences, PTSD= post-traumatic stress disorder

Supplemental Figure 2. Multiple moderated mediation model in the combined analytic sample.

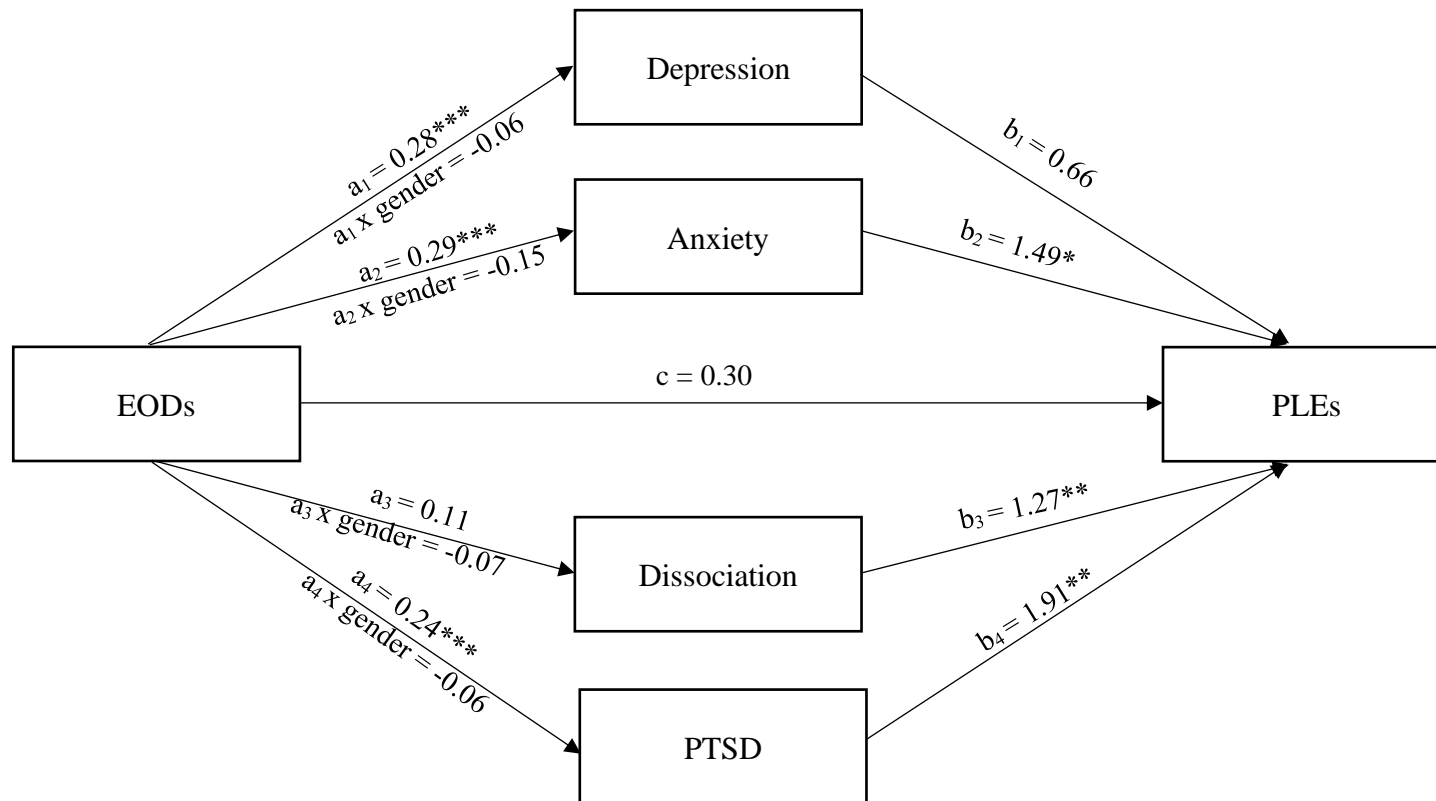

Notes. * $p > 0.05$, ** $p > 0.01$, *** $p > 0.001$; EODs= experiences of discrimination, PLEs= psychotic-like experiences, PTSD= post-traumatic stress disorder

Supplemental Figure 3. Multiple moderated mediation model in the Black subsample.

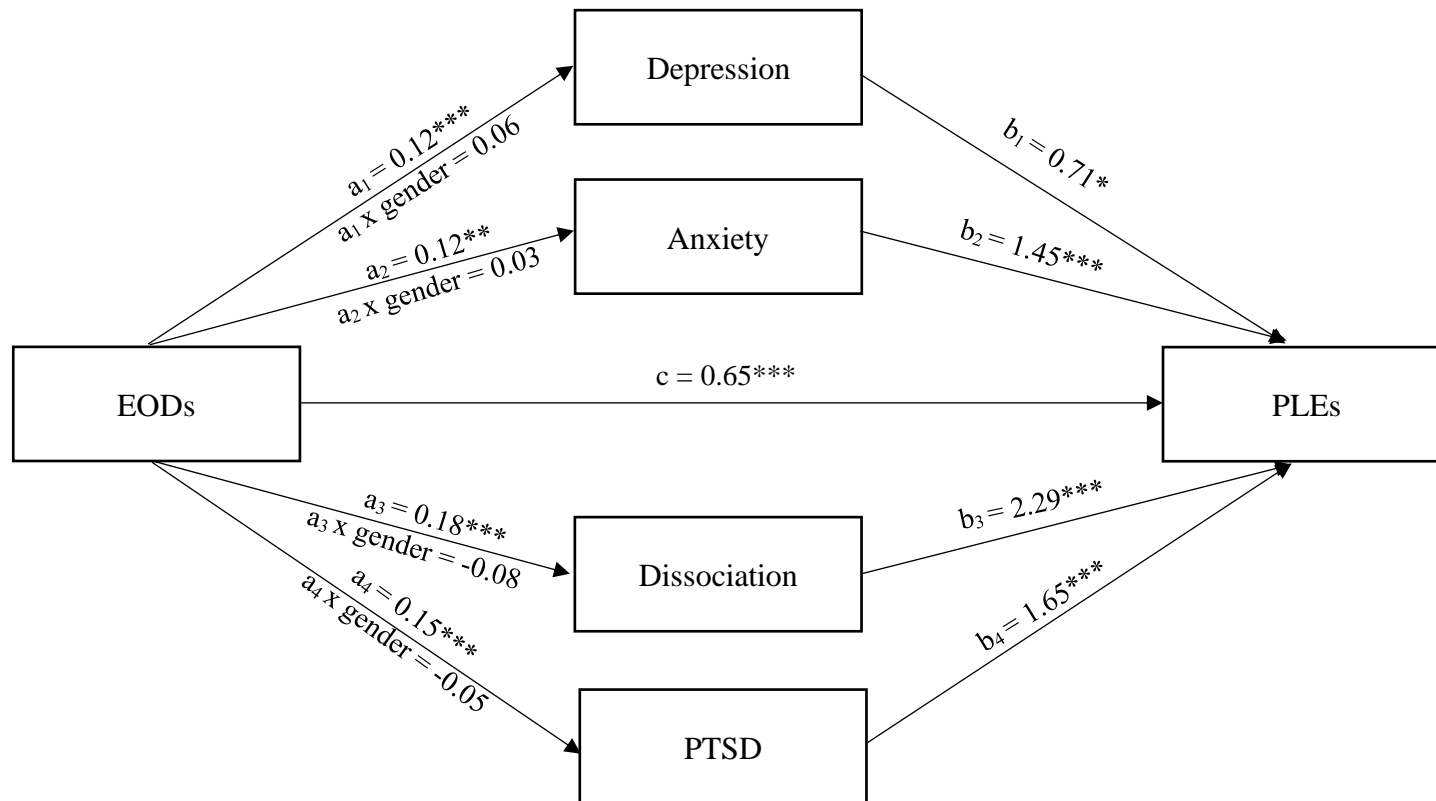

Notes: * $p > 0.05$, ** $p > 0.01$, *** $p > 0.001$; EODs= experiences of discrimination, PLEs= psychotic-like experiences, PTSD= post-traumatic stress disorder

Supplemental Figure 4. Multiple moderated mediation model in the Asian subsample.

Notes: * $p > 0.05$, ** $p > 0.01$, *** $p > 0.001$; EODs= experiences of discrimination, PLEs= psychotic-like experiences, PTSD= post-traumatic stress disorder

Supplemental Figure 5. Multiple moderated mediation model in the Non-Hispanic White subsample.

Notes: * $p > 0.05$, ** $p > 0.01$, *** $p > 0.001$; EODs= experiences of discrimination, PLEs= psychotic-like experiences, PTSD= post-traumatic stress disorder
