Variable	Description
participant*	Unique participant ID assigned automatically by psytoolkit.org
ID*	Simpler participant ID
condition	Independent variable: 1 = pro-reflection, 2 = pro-intuition
ReflectiveMemory*	Open-ended memory written by participant if condition = 1
IntuitiveMemory*	Open-ended memory written by participant if condition = 2
memory_code*	Open-ended memory coded by a single research assistant as apparently compatible with instructions (1) or potentially not (2)
believeGod	Belief in God item
religiousbelief_1	Intuitive Religious Belief Scale items 1 through 5
religiousbelief_2	
religiousbelief_3	
religiousbelief_4	
religiousbelief_5	
FII_1	Faith in Intuition items 1 through 11
FII_2	
FII_3	
FII_4	
FII_5	
FII_6	
FII_7	
FII_8	
FII_9	
FII_10	
FII_11	
crt1*	Open-ended response to first CRT item
crt1_code	crt1 coded into the following categories: 1 = correct (5 cents) 2 = incorrect-intuitive (10 cents) 3 = 0.05[1] 4 = 0.1 5 = incorrect-other
crt2*	Open-ended response to second CRT item
crt2_code	crt2 coded into the following categories: 1 = correct (5 minutes) 2 = incorrect-intuitive (100 minutes) 3 = incorrect-other
crt3*	Open-ended response to third CRT item
crt3_code	crt3 coded into the following categories: 1 = correct (47th day) 2 = incorrect-intuitive (24th day) 3 = incorrect-other

---

[1] There were many responses that provided the correct answer but in the wrong units. We coded these separately and considered them correct (see manuscript).

check	Attention check question testing correct recall of instructions (see Appendix of manuscript) 1 = Carefully reasoning (correct option if condition = 1) 2 = Using intuition/first instinct (correct option if condition = 2) 3 = I do not remember
sex	1 = female; 2 = male
age	Open-ended age in years
poliorient*	Single-items political orientation (1 = extreme left; 7 =extreme right)
childhoodincome*	Family income during childhood (1 = very bad; 5 = very good)
ethnicity*	Ethnic identification 1 = Turkish 2 = Kurdish 3 = Armenian 4 = Greek 5 = Arabic 6 = Balkans 7 = People of the Caucasus 8 = Other
otherethnicity*	Open-ended ethnic identification if Ethnicity = 8
residence*	Categorization of residence for most part of life 1 = Metropolis 2 = City 3 = Big Town 4 = Smaller Town 5 = Village
religion	Religious affiliation 1 = Atheist 2 = Agnostic 3 = Muslim 4 = Belief in God without any organized religion 5 = Christian 6 = Jewish 7 = Buddhist 8 = Other
otherreligion*	Open-ended religion if religion = 8
debrief1	Open-ended response when asked what the study is about
debrief2*	Open-ended response when asked whether any problems were experienced during participation or whether there is any other information the participant would like to convey to the experimenter
TIME_start*	Time stamp at the beginning of the experiment: YEAR-MM-DD-HH-MM
TIME_end*	Time stamp at the end of the experiment: YEAR-MM-DD-HH-MM
TIME_total*	Difference between TIME_start and TIME_end in terms of minutes

*These variables are not reported in the manuscript or not necessary for reproducing the analyses (i.e., not evoked by the data analysis script). "debrief1" is referred to briefly.
