The table depicts the coefficient on the Treaty indicator for different model specifications. "Ex Post" compares treaties to ex post congressional-executive agreements. "Other" compares treaties to the remaining executive agreements.

Figure 1: Agreement Types over Time

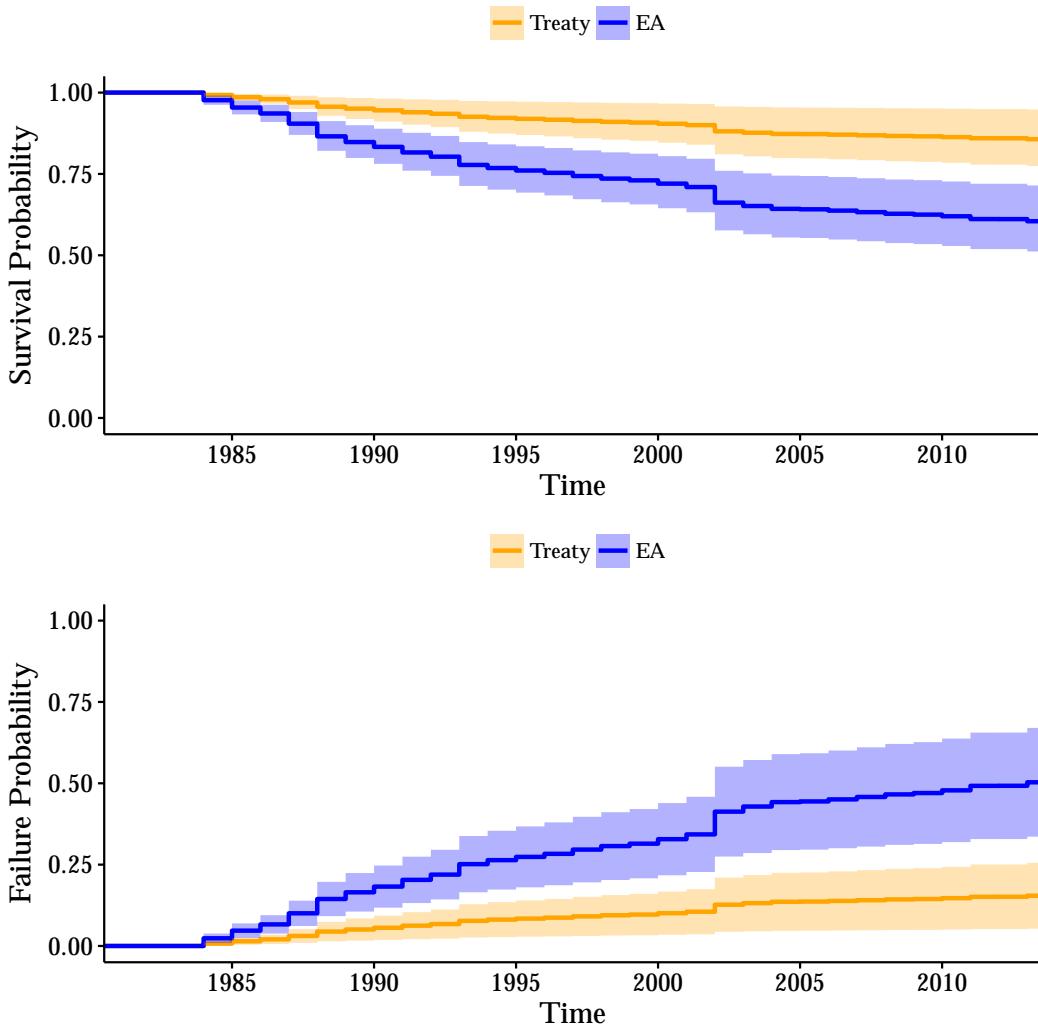

This figure depicts the use of executive agreements and treaties over time.

Figure 2: Agreement Types by President

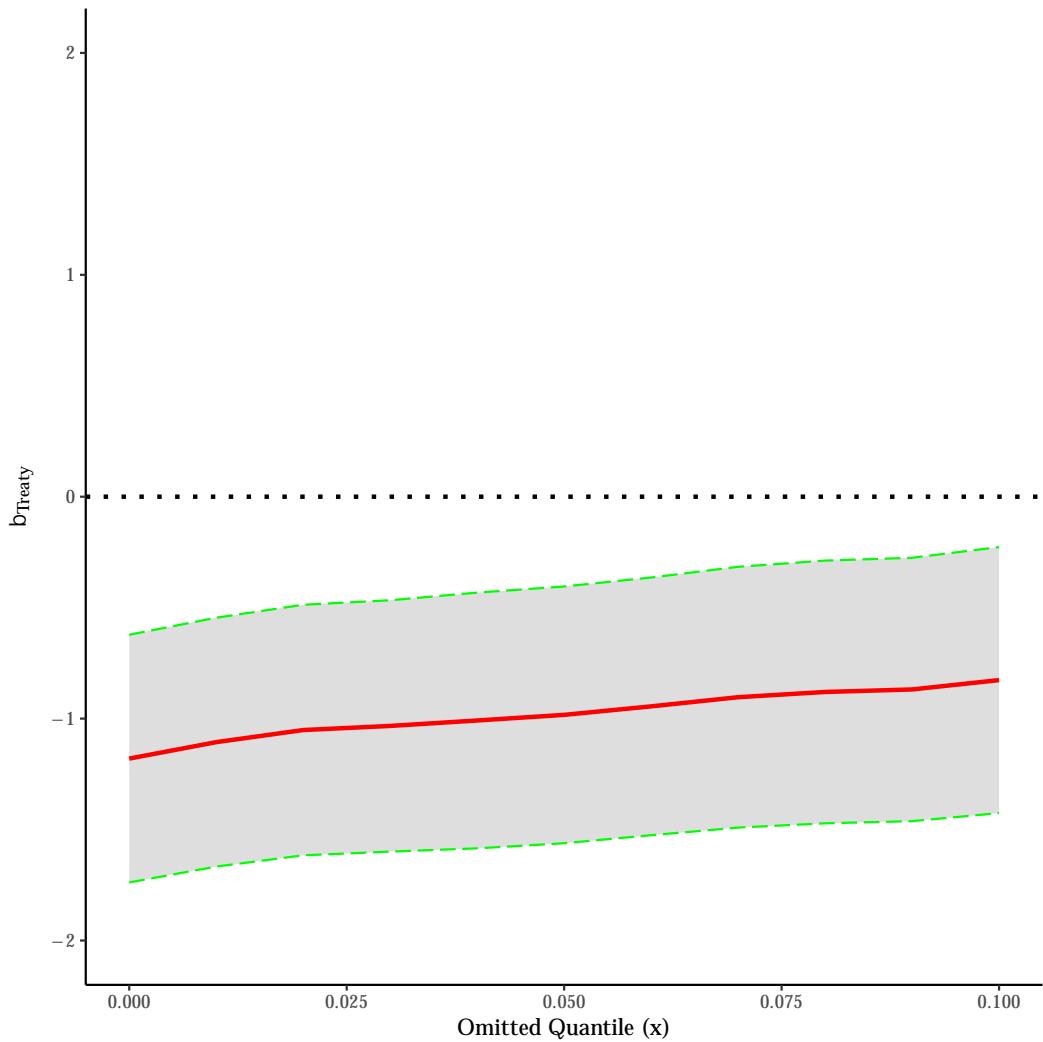

This figure depicts the use of executive agreements and treaties by the different presidents.

Figure 3: Survival and Hazard Curves by Agreement Type

This figure depicts estimated survival curves (top) and estimates hazard curves (bottom) for treaties and agreements over the period of observation. Shaded areas are 95% confidence intervals.

Figure 4: Omitting Sole Executive Agreements

This figure depicts the coefficient on the treaty indicator of Model (5) under the assumption that the x quantile of agreements are sole executive agreements and should thus be omitted from the analysis. The shaded area is the 95% confidence interval.
