

## Supplemental Figure

**Supplemental Figure 1.** Preventive effect of high amylose cornstarch (HAS) on plasma alanine (ALT; A) and aspartate aminotransferases (AST; B) activities in ischemia-reperfusion (IR) rats fed the C and 20% HAS diets. Values are means  $\pm$  SEM,  $n = 12$  or  $13$ . Rats were subjected to 30 min of ischemia followed by 48 h of reperfusion.
