

**Supplementary Fig. 1.** Distal intestine in Atlantic salmon fed different dietary combinations of SBM and BM, or neither for 47 d, showing an overview including simple and complex folds. (a) FM diet, (b) 0-BM diet, (c) 25-BM diet, (d) 50-BM diet, (e) 100-BM diet, (f) 150-BM diet, (g) 200-BM diet, and (h) 300-BM diet. Note the atrophy in simple folds of (b)–(d), and less prominent in (e). Magnification is the same in micrographs (a)–(h); scale bar = 1000  $\mu\text{m}$ .
