iAUC, incremental area under the curve; coef., coefficient; XXL, extremely large; XL, very large; L, large; M, medium; S, small; XS, very small; IDL, intermediate-density lipoprotein.

^aNon-significant sex*meal interactions were excluded from the model.

^bMen compared to women.

Supplemental Table 2. Coefficients and P -values for the sex difference in meal responses for XS-VLDL particle concentration^a

	iAUC _{0-6 h}		
	Coef. ^b	P	P^*
XS-VLDL			
Butter	1.79e-09	0.43	1
Cheese	5.14e-10	0.81	1
Whipped cream	-1.70e-09	0.45	1
Sour cream	-6.77e-09	0.003	0.01

XS, very small; iAUC, incremental area under the curve, Coef., Coefficient

^a Results are from a linear mixed model.

^b Men compared to women.

* Bonferroni corrected P -value.

Supplemental Table 3. Coefficients and *P*-values for meal comparisons for VLDL subclass particle concentrations in women and men together^a
