

**Supplementary Table 3.** Indicator species analysis results of plant species present in study sites. Species are ranked by their indicator value and frequency indicates the number of sites a plant species is present in.

| Dakota skipper site | Species                           | Indicator value | P-value | Frequency |
|---------------------|-----------------------------------|-----------------|---------|-----------|
| Negative            | <i>Rosa arkansana</i>             | 0.546           | 0.111   | 33        |
|                     | <i>Solidago mollis</i>            | 0.333           | 0.240   | 16        |
|                     | <i>Medicago lupulina</i>          | 0.216           | 0.254   | 8         |
|                     | <i>Campanula rotundifolia</i>     | 0.229           | 0.304   | 12        |
|                     | <i>Achillea millefolium</i>       | 0.414           | 0.306   | 28        |
|                     | <i>Gaillardia aristata</i>        | 0.189           | 0.311   | 7         |
|                     | <i>Grindelia squarrosa</i>        | 0.162           | 0.389   | 6         |
|                     | <i>Taraxacum officinale</i>       | 0.284           | 0.390   | 18        |
|                     | <i>Symporicarpos occidentalis</i> | 0.501           | 0.423   | 39        |
|                     | <i>Astragalus species</i>         | 0.162           | 0.434   | 6         |
|                     | <i>Ambrosia coronopifolia</i>     | 0.135           | 0.473   | 5         |
|                     | <i>Avenula hookeri</i>            | 0.195           | 0.543   | 12        |
|                     | <i>Geum triflorum</i>             | 0.108           | 0.569   | 4         |

**Supplementary Table 4.** Soil laboratory analysis methods and procedures used on soil samples taken from 0–15 cm.

| Variable                                | Sites      | Method                              | Analysis  | Citation                      |
|---|------------|-------------------------------------|---|-------------------------------|
| Gravimetric content of field-moist soil | 2015, 2016 | Oven dry method                     |   | Ellert <i>et al.</i> 2007     |
| Gravimetric content of air-dry soils    | 2015, 2016 | Oven dry method                     |   | Ellert <i>et al.</i> 2007     |
| Bulk density                            | 2015, 2016 | Standard core method                |   | Hao <i>et al.</i> 2008        |
| Particle analysis                       | 2015, 2016 | Modified pipette procedure          |   | Indorante <i>et al.</i> 1990  |
| Ammonium ( $\text{NH}_4^+$ )            | 2015, 2016 | Potassium chloride (KCl) extraction | Colorimetry using a technicon auto analyzer                         | Maynard <i>et al.</i> 2008    |
| Ammonia ( $\text{NO}_3^-$ )             | 2015, 2016 | Potassium chloride (KCl) extraction | Colorimetry using a technicon auto analyzer                         | Maynard <i>et al.</i> 2008    |
| pH                                      | 2015       | 1:2 ratio of soil to water          |   | Hendershot <i>et al.</i> 2008 |
| Electrical conductivity (EC)            | 2015       | 1:2 ratio of soil to water          |   | Miller and Curtin 2008        |
| Sodium (Na)                             | 2015       | Mehlich 3-Extractable Elements      | Flame emission on Agilent's atomic absorption spectrometer AA240    | Ziadi and Sen Tran 2008       |
| Calcium (Ca)                            | 2015       | Mehlich 3-Extractable Elements      | Atomic absorption on Agilent's atomic absorption spectrometer AA240 | Ziadi and Sen Tran 2008       |
| Magnesium (Mg)                          | 2015       | Mehlich 3-Extractable Elements      | Atomic absorption Agilent's atomic absorption spectrometer AA240    | Ziadi and Sen Tran 2008       |
