

The development and usability of a web-based mobile application as a dairy intake screener for South African adults

Monique C Piderit, Zelda White and Friedeburg AM Wenhold

SUPPLEMENTARY FILE

Figure legends:

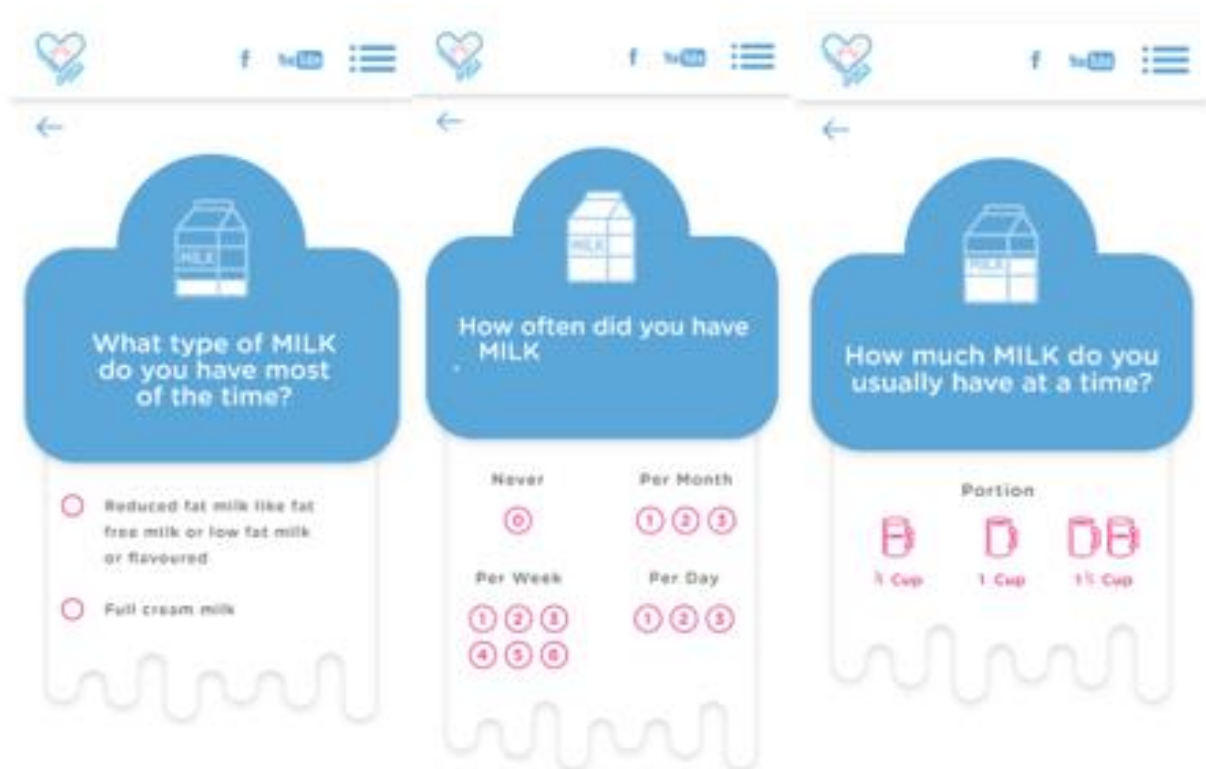

Supplementary Figure S1:

Example images of the type, frequency of consumption and amount (portion sizes) in the “Dairy Diary”.

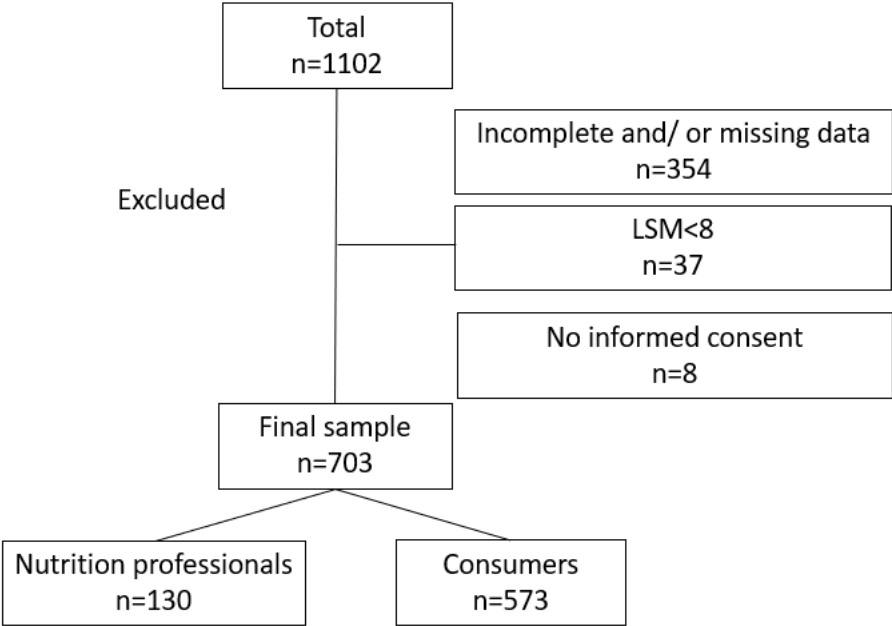

Supplementary Figure S2:

Sample for the usability study.

Supplementary Figure S1:

Supplementary Figure S2:

LSM (living standards measure) is a socioeconomic segmentation tool in South Africa for classifying consumers independent of race/ethnicity, sex, age or any other variable.
