

# Video analysis of host–parasite interactions in nests of Darwin’s finches

JODY A. O’CONNOR, JEREMY ROBERTSON and SONIA KLEINDORFER

---

## Appendix

These five videos (in both Quicktime and Windows Media Video formats) are from a nest containing two > 8 day old *Geospiza fortis* nestlings on 10–11 February 2008 on Santa Cruz Island.

### Video 1

High *P. downsi* larval activity in the nest base (time: 20.00).

### Video 2

*P. downsi* larva emerging from the naris of a nestling (time: 04.30).

### Video 3

Nestling preening its wing and eating a *P. downsi* larva (time: 19.30).

### Video 4

Female finch probes into nares of nestling (time: 07.30).

### Video 5

Female finch probes into inner base of nest where larvae are found (time: 08.00).
