

Eurasian otter *Lutra lutra* in developing countries: a resurvey of Albania 22 years after the fall of communism

ALESSANDRO BALESTRIERI, SIMONE MESSINA, FRANCESCA PELLA, CLAUDIO PRIGIONI
NICOLA SAINO and MAURO FASOLA

TABLE S1 Habitat variables recorded for each sampled stretch of watercourse in Albania in a survey during 24 June–18 July 2013 to record the Eurasian otter *Lutra lutra*.

ID	Latitude	Longitude	Otter occurrence ¹	Altitude (m)	Water pollution ²	Dominant land use ³	Watercourse width (m)	Watercourse depth ⁴	Water speed ⁵	%C ⁶
1	41.15215	20.37016	1	289	1	2	10	2	2	25
2	41.09851	20.44242	1	560	1	2	22	2	2	65
3	41.21921	20.29848	1	320	1	1	15	1	3	20

¹0, absent; 1, present

²1, absent; 2, low; 3 medium–high

³1, bare soil; 2, crops; 3, pasture/shrubs; 4, woods

⁴1, ≤0.5 m; 2, 0.51–1.0 m; 3, 1.1–2.0 m; 4, >2.0 m

⁵1, stagnant; 2, slow; 3, moderate/high

⁶Percentage cover of agricultural and urban areas in a 4 km² area centred on each survey site
