

Supplemental Figure 2

Annual climate values from the first principal component of data from one Sierra Nevada and three western Great Basin weather stations (see Methods) AD 1900—AD 2020. Standardized data for minimum and maximum temperatures (Tmin, Tmax, respectively), water year precipitation (WY precip), and indices of the PDO (Pacific Decadal Oscillation) and AMO (Atlantic Multidecadal Oscillation). Temperatures and precipitation values extracted from the Historical Climate Network (<https://www.ncdc.noaa.gov/ushcn/data-access>); indices of PDO (<http://research.jisao.washington.edu/AMO/PDO/latest.txt>) and AMO (<https://www.esrl.noaa.gov/psd/data/correlation/amon.us.long.data>).
