## **Supplemental Figure Captions**

**Figure S1:** Diagram of pollen concentrations (grains/mL) observed in the Stella Lake core. Concentrations were calculated using the method of Stockmarr (1971).

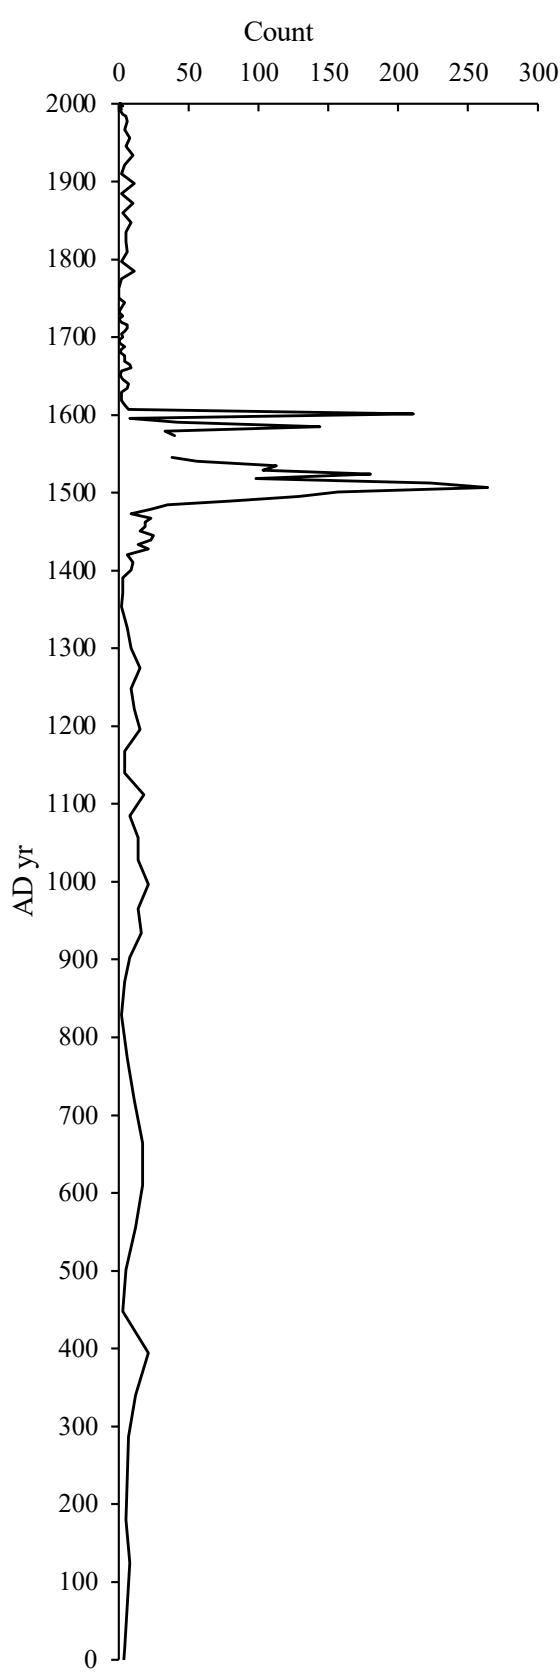

**Figure S2:** Diagram of pollen accumulation rates (grains/cm<sup>2</sup>/year) observed in the Stella Lake core.

**Figure S3:** Graph describing the amount of woody and non-woody (lattice and grass) charcoal pieces (counts) found throughout the Stella Lake 2009 core. Age was determined by converting midpoint cal yr BP ages (calibrated using IntCal13) to AD yr.
