ONLINE FIG. 1. Plan of the Saxon Shore fort in *Richborough I*, showing the source for Cunliffe's representation of the fallen wall and 'footings' (Bushe-Fox 1926, pl. xxxi).

ONLINE FIG. 2. Fallen wall covered in vegetation, 2008.

ONLINE FIG. 3. The west tower of the north wall, showing the scars of the robbed side walls and the base of the tower, and the uninterrupted tile courses that show the scars of robbed side walls. Note that the second tile course from the bottom is interrupted within the walls of the tower, where a repair to the wall face has been effected.

ONLINE FIG. 4. The east tower of the south wall, showing the scars of the robbed side walls, the base of the tower and the interrupted tile courses.

ONLINE FIG. 5. The base of the north tower of the west wall, showing the tile courses carried continuously around the exterior face of the tower.

ONLINE FIG. 6. An area of the internal (south) face of the north wall of the fort, showing uneven vertical scarring and changes in facing similar to those on the supposed east interval tower.

ONLINE FIG. 7. The western edge of the supposed east interval tower. The facing above the bottom tile course is flush, with no sign of a scar from a robbed side wall to a tower.
