

Appendix: Chronology of Japanese price surveys

The file “Nichijō seikatsuhin kakaku chōsa” [Price surveys of daily use items] (JACAR B11090351600) contains 50 items, compiled over the space of 10 years. The timing of surveys shows Japanese interest expanding with the outbreak of the Great War, and deepening in northern China in its aftermath.

A composite of these 60 price measurements is available at “China price data, 1910-1920” doi.org/10.7910/DVN/XSRAY9.
