

Supplementary table 1: Deterministic results of yearly and total treatment cost in million Euros per strategy.

Costs	Current guideline (EUR)	APM at any time (EUR)	Non-surgical (EUR)
Year 1	47.84	63.83	42.93
Year 2	95.88	111.19	87.08
Year 3	139.92	154.02	128.46
Year 4	183.21	197.80	168.09
Year 5	223.88	238.85	208.33
Total costs	690.74	765.69	634.89

APM = arthroscopic partial meniscectomy

Supplementary figure 1: Yearly and overall cost per treatment strategy. Error bars represent the 95 percent confidence interval of the overall 5-year treatment cost of the strategy. APM = arthroscopic partial meniscectomy.

Supplementary figure 2: Boxplot of the budget impact of the 'APM at any time' and 'Current guideline' strategies compared to the 'Non-surgical' strategy over 1000 PSA iterations.
