

Supplementary Table 2. Pearson correlations based on complete case analysis of domains in the entire patient sample.

Construct	Domain	N	Visual IPS	Verbal IPS	EF: Cognitive flexibility	EF: Inhibition	Letter fluency	Visuospatial functioning	Emotion recognition	Theory of mind	Cognitive empathy	Affective empathy	Adaptive strategy use	Maladaptive strategy use	Social skills	Social functioning	Total Intelligence
Neurocognition																	
	Visual IPS	23	1														
	Verbal IPS	23	0.15	1													
	EF: Cognitive flexibility	22	0.09	0.26	1												
	EF: inhibition	23	0.06	0.78***	0.24	1											
	Letter fluency	19	0.35	0.21	0.2	0.38	1										
	Visuospatial functioning	23	0.32	-0.09	0.02	-0.11	0.32	1									
Social cognition																	
	Emotion Recognition	23	0.06	0.08	-0.04	0.06	0.12	0.25	1								
	Theory of mind	21	0.09	0.16	-0.15	0.07	0.4	0.35	0.31	1							
	Cognitive Empathy	20	-0.24	0.02	-0.33	0.31	-0.25	0.32	0.36	0.16	1						
	Affective Empathy	20	-0.19	0.14	0.19	0.26	0.25	0.27	0.22	0.17	0.37	1					
Emotion-regulation																	
	Adaptive strategy use	23	-0.09	-0.51*	0.08	-0.26	0.05	0.06	0.31	0.22	0.13	0.15	1				
	Maladaptive strategy use	23	0.1	-0.06	-0.34	-0.06	0.2	0	-0.1	0.27	-0.15	-0.13	-0.34	1			
Social competence																	
	Social skills	22	0.26	0.2	0.22	0.19	0.17	0.33	0.31	0.12	0.35	0.52*	0.28	-0.54*	1		
	Social functioning	20	0.34	-0.36	-0.11	-0.24	0.46	0.45*	0.22	0.34	0.13	0.26	0.25	0.25	0.38	1	
Intelligence (TIQ)		22	-0.05	-0.1	-0.12	-0.04	0.18	0.2	0.15	0.52*	0.15	0.3	0.44*	-0.04	0.34	0.12	1

Notes. N = sample size. IPS = Information processing speed. EF = Executive functioning. * p < .05, ** p < .01, *** p < .001.
