

Fig. S2: COVID-19 incidences vs time for each one of the 24 districts that make up the Greater Buenos Aires (GBA). The districts are compared with the GBA incidence as a function of the Symptom Onset Date (SOD), estimated from reported cases. First and last x -tics stands for April 2020 and February 2021, respectively. Details of the estimation of these incidences from reported data are given in Supplementary Material.
