

Data supplement

Mentally disordered offenders with children – study questionnaire

Patient identifier

Ward

Responsible medical officer

Date of birth

Date of admission

Section

Diagnosis

Index offence (including relationship of victim to offender)

Country of birth

Ethnic group

Number of children

Date/s of birth of child/children

Was the patient ever married to/living with (as a partner) the other parent?

Current location of child/children (i.e. who with (other parent, relatives, in care, adopted) and country/city of residence)
.

If adopted, whether:

- before age of 1 year
- before or after offence/admission?

Had there ever been a nuclear family (i.e. two parents living together with the child)?

Had there been childcare proceedings, and if so, what was the outcome?

Had the child/children been taken into care at any point before offence/admission?

Was the patient the primary carer of the child/children before the offence/admission?

Was there a history of abuse towards the child/children?

Does the child have supervised visits?

Is there any contact between the patient and child/children (if not, reason if known)?
.

Has the multidisciplinary team offered any support to the child/children of the patient regarding mental health/offence
issues in parent:

- if not, reason if known
- if yes, whether this was accepted and who provided the input?

Was the responsible medical officer aware:

- that the patient had children under 18?
- what had happened to the child/children?
