

Effect of enrichment on broiler leg health

Table 3 Summary of research on the effect of stocking density on leg health in broilers (page 1 of 2)

Study	Population	Group size (N) ^{1/}	High stocking density (Comparator)	Low stocking density (Exposure)	Outcome and the effect of exposure indicated as (↓) ² ,(↑) ³ or (0) ⁴ .
Seet & Azizah 1990	1 day to 8 weeks Mixed Hubbard	100 to 150 /3	0.07 m2/bird	1) 0.09 m2/bird 2) 0.11 m2/bird	Occurrence of leg weakness (0)
Sorensen et al 2000	1 day to 49 days Mixed Ross 208	Experiment 1: 120/3 Experiment 2: 275/8	Experiment 1: 435 cm2/bird Experiment 2: 455 cm2/bird	Experiment 1: 1) 625 cm2/bird 2) 833 cm2/bird Experiment 2: 625 cm2/bird	Experiment 1: Gait score (↓) Experiment 2: Gait score (↓) TD score (0) Prevalence of hock and footpad burns (↓) Valgus and varus (0) Curvature of tibia (0)
Hall 2001	1 day to 40 days Mixed Ross 508 and Ross PM3	12600 to 17000/4	40kg/m2	34kg/m2	Culled due to leg problems (↓) Prevalence of hock burn (↓) Prevalence of leg bruises (0) Prevalence of leg breakage (0)
McLean et al 2002	1 day to 6 weeks Mixed Ross 308	130 to 208 /4	40 kg/m2	1) 34 kg/m2 2) 28 kg/m2	Contact dermatitis score of hock and foot (0) Gait score (0)
Tablante et al 2003	1 day to 42 days Mixed Avian	45 to 90/3	20 birds/m2	1) 15 birds/m2 2) 10 birds/m2	TD prevalence (0) Bone ash of tibiotarsus (0)
Thomas et al 2004	1 day - 5 weeks Males Not stated	13 to 50/6	20 birds/m2	1) 5 birds/m2 2) 15 birds/m2 3) 10 birds/m2	Footpad and hock burn score (↓) Gait score (↓)
Dozier et al 2006	1 day to 36 days Males Ross x Ross 708	75 to 120/8	40 kg/m2	1) 35 kg/m2 2) 30 kg/m2 3) 25 kg/m2	Footpad score (↓) Gait score (0)
Ravindran et al 2006	1 day to 35 days Males Ross	42-62/4	24 birds/m2	1) 20 birds/m2 2) 16 birds/m2	Footpad and hock burn score (0) Gait score (0)
Meluzzi et al 2008	1 day to 49 days Males Ross 508	66 to 84/8	14 birds/m2	11 birds/m2	Incidence of hock burns (↓)
Buijs et al 2009	1 day to 39 days Mixed Ross 308	8 to 72/4	1) 56 kg/m2 2) 47 kg/m2 3) 41 kg/m2 4) 35 kg/m2	1) 33 kg/m2 2) 23 kg/m2 3) 15 kg/m2 4) 6 kg/m2	LTL test (↑) Footpad and hock dermatitis score (↓)
Skrbic et al 2009	1 day to 42 days Mixed Hubbard	77 to 123/5	16 birds/m2	1) 13 birds/m2 2) 10 birds/m2	Gait score (0) Hock burn lesion score (0) Footpad lesion score (0)

1. Group size varies according to density

2. (↓) Low stocking density resulted in an significant decrease in the outcome. For all outcomes, except LTL, a decrease in the outcome signifies a positive effect of low stocking density on leg health.

3. (↑) Low stocking density resulted in an significant increase in the outcome.

4. (0) Low stocking density had no significant effect on the outcome.

Effect of enrichment on broiler leg health

Table 3 Summary of research on the effect of stocking density on leg health in broilers (page 2 of 2)

Study	Population	Group size (N) ^{1/}	High stocking density (Comparator)	Low stocking density (Exposure)	Outcome and the effect of exposure indicated as (↓) ² ,(↑) ³ or (0) ⁴ .
	Age	replications per treatment			
Ventura <i>et al</i> 2010	1 day to 9 weeks Mixed Ross 308	36 to 80/4	18 birds/m ²	1) 13 birds/m ² 2) 8 birds/m ²	Hock burn score (↓) Footpad dermatitis score (↓)
Skrbic <i>et al</i> 2011	1 day to 42 days Males Hubbard	Not stated (total of 1380)/4	20 birds/m ²	1) 15 birds/m ² 2) 10 birds/m ²	Gait score (0) Hock burn score (0) Footpad lesion score (↓)
Zuowei <i>et al</i> 2011	1 day to 42 days Mixed Ross 308	30 to 49/6	Males: 16 birds/m ² Females: 18 birds/m ²	Males: 10 birds/m ² Females: 12 birds/m ²	Gait score (↓) Footpad burn score (↓)
Buijs <i>et al</i> 2012	1 day to 39 days Mixed Ross 308	8 to 72/4	1) 13,6 birds/m ² 2) 15,5 birds/m ² 3) 18,5 birds/m ² 4) 21,8 birds/m ²	1) 12,1 birds/m ² 2) 8,8 birds/m ² 3) 5,8 birds/m ² 4) 2,4 birds/m ²	TD score (0) Tibia length (↑) Tibia strength (↑) Other tibia measures (0) Femur measures (0)
Knierum 2013	1 day - 40 days Mixed Lohmann	18 to 42/3	1) 40 kg/m ² 2) 35 kg/m ²	1) 25 kg/m ² 2) 18 kg/m ²	Gait score (↓) Footpad lesion score (↓)
Hongchao <i>et al</i> 2013	1 day to 5 weeks Mixed Arbor Acres	48 to 80/3 replicates per treatment	20 birds/m ²	1) 16 birds/m ² 2) 12 birds/m ²	Gait score (0) Hock burn score (↓) Footpad burn score (↓)
Das & Lacin 2014	1 day to 42 days Males Ross 308	Not stated (total of 480)/10	20 birds/m ²	12 birds/m ²	Gait score (0) TD score (0)

1. Group size varies according to density

2. (↓) Low stocking density resulted in an significant decrease in the outcome. For all outcomes, except LTL, a decrease in the outcome signifies a positive effect of low stocking density on leg health.

3. (↑) Low stocking density resulted in an significant increase in the outcome.

4. (0) Low stocking density had no significant effect on the outcome.
