

Supplementary Table S3. Percentiles for PAND and Phi and percentiles values (Parker et al., 2011)

Percentiles	PAND (0-100)	Phi (0-100)	CIs	Effect size
10 th	0.20	0.26	[-.02<.22<.44]	Small
25 th	0.38	0.49	[.26<.51<.68]	Small
50 th	0.64	0.72	[.47<.68<.82]	Medium
75 th	0.86	0.83	[.71<.86<.94]	Large
90 th	1.00	0.95	[.79<.94<.99]	Large

These percentile values will be used to interpret the magnitude of change for PAND and Phi. The effect size magnitude changes into three categories – ‘small’, ‘medium’ and ‘large’.
