

Appendix C: Data extraction sheet column headings

A SYSTEMATIC REVIEW, AND META-ANALYSIS, EXAMINING THE PREVALENCE OF PRICE PROMOTIONS ON FOODS AND WHETHER THEY ARE MORE OR LESS LIKELY TO BE FOUND ON UNHEALTHY FOODS.

PAPER DETAILS		Paper ID		
		Author (Year)		
		Full reference		
ELIGIBILITY		Did the study measure price promotion prevalence in a retail setting?		
		Did the study measure difference (in price promotion prevalence) between healthy and unhealthy foods, in a retail setting?		
		Reason for exclusion		
STUDY DETAILS		Country		
		Region, Country		
		WHO income category		
		Study design		
		Data (collection/type)		
STUDY DEFINITIONS		of price promotions		
		of healthy and unhealthy foods		
DETAILS ABOUT SAMPLE OF FOODS		Sample - shops		
		What type of shops?		
		Random sample?		
		Sample-foods		
		What type of foods?		
DATA COLLECTION DETAILS		Comments - sample		
		Data collection methods		
		Data collection time period		
		Type of promotional data		
Systematic review analyses		Type of promotional data - Comments		
		Analysis: RQ1		
RESEARCH QUESTION 1 ANALYSES		FOODS - Proportion on Promotion		
		RESEARCH QUESTION 2 ANALYSES		Measure of healthfulness
				What was the difference?
				Was difference significant? ($p < 0.05$)
				Analysis
				Comments
Notes				
Risk of bias		Definition of population		
		criteria for inclusion of shops described		
		criteria for inclusion of foods described?		
		Sampling strategy		
		Was the sample drawn randomly from the population or is the sample a complete audit of the population?		
		Description of sample:	Description of size of foods? y/n	
			Description of geographic region? y/n	
			Description of sample size of shops	
		Definition of outcome variable (price promotion):	Definition of price promotions? y/n	
			Has the method of categorising foods with 'price promotions' been validated (including inter-rater reliability)? y/n	
Definition of potential exposure variables:	Definition of exposure variables? y/n			
	Has the method of categorising foods for exposure variables been validated (including inter-rater reliability)? y/n
