Figure 1: **Present Economy Performance - Triple Interaction with Party**
Note: Linear Predictions of Current Economy Evaluations. Higher values indicate more optimism (economy is getting better). Covariate profile held constant at modal/mean categories: Labour, 56-65 age bracket, A-level educational attainment, female, income: 10-20k.
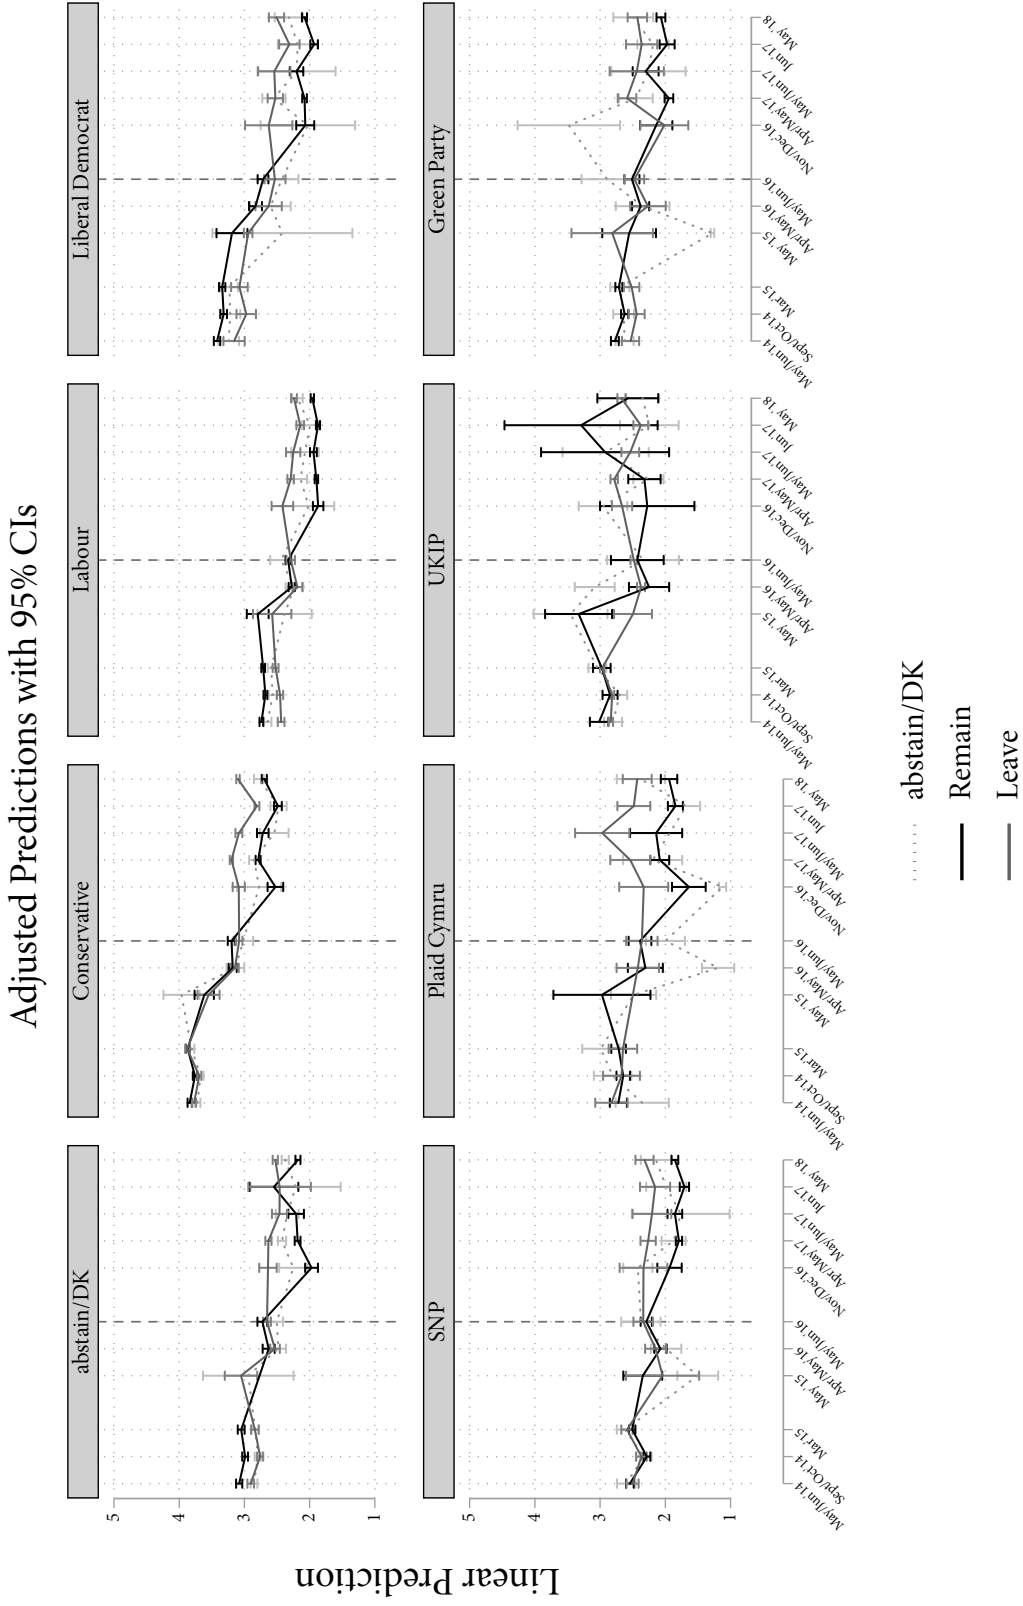

Figure 2: **Retrospective Economy Performance - Triple Interaction with Party**
Note: Linear Predictions of Retrospective Evaluations. Higher values indicate more optimism (economy got better). Covariate profile held constant at modal/mean categories: Labour, 56-65 age bracket, A-level educational attainment, female, income: 10-20k.
