

## Appendix 5: Logistic regression analyses

Table A5.1: Coefficients, standard errors, and p-values of full model logistic regression analysis. \* = p < 0.1, \*\* = p < 0.05. Pre-test 1 and Ward 3 (control) are taken as reference categories.

<b>Dependent variable: compliance</b>	
	<b>B(SE)</b>
<b>Ward 1</b>	-0.22 (0.57)
<b>Ward 2</b>	-0.38 (0.53)
<b>Pre-test 2</b>	-0.53 (0.60)
<b>Post-test 1</b>	-0.07 (0.59)
<b>Post-test 2</b>	0.16 (0.65)
<b>Ward 1*Pre-test 2</b>	0.59 (0.78)
<b>Ward 1*Post-test 1</b>	2.08** (1.02)
<b>Ward 1*Post-test 2</b>	0.87 (0.88)
<b>Ward 2*Pre-test 1</b>	0.86 (0.73)
<b>Ward 2*Post-test 1</b>	1.38* (0.79)
<b>Ward 2*Post-test 2</b>	1.31 (0.88)
<b>Constant</b>	0.29 (0.44)
<b>N</b>	348
<b>R<sup>2</sup></b>	0.10

Table A5.2: Coefficients, standard errors, p-values, confidence intervals and odd ratios of ward 1 logistic regression analysis. \* = p < 0.1, \*\* = p < 0.05. Pre-test 1 is taken as reference category.

<b>Dependent variable: compliance</b>	
<b>B(SE)</b>	<b>95% CI for Odds Ratio</b>

		<b>Lower</b>	<b>Odds</b>	<b>Upper</b>
<b>Pre-test 2</b>	0.06 (0.51)	0.40	1.06	2.86
<b>Post-test 1</b>	2.02** (0.83)	1.47	7.50	38.28
<b>Post-test 2</b>	1.03* (0.59)	0.88	2.81	8.99
 <b>Constant</b>	0.07 (0.36)			
<b>N</b>	105			
<b>R<sup>2</sup></b>	0.13			

Table A5.3: Coefficients, standard errors, p-values, confidence intervals and odd ratios of ward 2 logistic regression analysis. \*\* = p < 0.05. Pre-test 1 is taken as reference category.

#### **Dependent variable: compliance**

	<b>B(SE)</b>	<b>95% CI for Odds Ratio</b>		
		<b>Lower</b>	<b>Odds</b>	<b>Upper</b>
<b>Pre-test 2</b>	0.33 (0.41)	0.62	1.39	3.10
<b>Post-test 1</b>	1.32** (0.52)	1.35	3.74	10.38
<b>Post-test 2</b>	1.47** (0.58)	1.40	4.36	13.62
 <b>Constant</b>	-0.09 (0.30)			
<b>N</b>	152			
<b>R<sup>2</sup></b>	0.10			

Table A5.4: Coefficients, standard errors, p-values, confidence intervals and odd ratios of ward 3 logistic regression analysis. Pre-test 1 is taken as reference category.

<b>Dependent variable: compliance</b>				
	<b>B(SE)</b>	<b>95% CI for Odds Ratio</b>		
		<b>Lower</b>	<b>Odds</b>	<b>Upper</b>
<b>Pre-test 2</b>	-0.53 (0.60)	0.18	0.59	1.90
<b>Post-test 1</b>	-0.07 (0.59)	0.30	0.94	2.96
<b>Post-test 2</b>	0.16 (0.65)	0.33	1.18	4.25
<b>Constant</b>	0.29 (0.44)			
<b>N</b>	91			
<b>R<sup>2</sup></b>	0.02
